

Transform Content Creation: Using AI Prompts to Generate 10X More Ideas in Half the Time

Niki Mosier

SEO Manager
NASM

THE PROBLEM

You know this feeling

The calendar is due, the ideas aren't coming, and "just post more" isn't a strategy. For most marketers, ideation is the bottleneck — not the writing.

It's not a writing problem.

It's an ideation problem, and it's the one nobody schedules time for.

Blank-page block

You stare at the cursor. The good ideas feel already taken.

The content treadmill

Every channel wants more, more often — on the hours you already have.

Creator burnout

Scrambling for ideas week after week is exhausting — and it shows in the work.

So we turn to AI... and get this

THE LAZY PROMPT

“Give me 10 content ideas about fly fishing.”

WHAT YOU GET BACK

“Top 10 Fly Fishing Tips for Beginners”

“The Benefits of Fly Fishing”

“A Guide to Choosing the Right Rod”

Generic

Off-brand

Forgettable

The tool isn't the problem.

The prompt is.

Generic prompts get generic answers. The AI has no idea who you are, who you're talking to, or what your brand sounds like — so it gives everyone the same beige ideas.

THE SHIFT

AI ISN'T YOUR BRAINSTORM PARTNER. **YOUR BRAND IS.**

Feed the AI your brand — voice, audience, pain points — and it stops guessing. It becomes the fastest, most on-brand ideation partner you've ever had.

Train it on your brand — once

Not fine-tuning. Not code. Just a reusable brand profile you paste in — six inputs that turn a blank AI into your brand's ideation partner.

1

Brand voice

How you sound — and what you'd never say

2

Audience

Exactly who you're talking to — and what they already know

3

Pain points

What keeps your audience up at night

4

Content pillars

Your core topics and themes

5

Channels

Where you actually publish, and at what length

6

Offer / CTA

The next step you want them to take

A list of adjectives is not a voice

WHY IT MATTERS

Voice is the difference between 50 ideas you can publish and 50 ideas you have to rewrite. “Professional and friendly” describes almost every brand in your category — so it tells the AI nothing, and it hands you back the same beige copy as your competitor.

NO GUIDELINES? START HERE

- Paste your three best-performing posts and ask AI to reverse-engineer the voice rules. Edit what it gets wrong.
- Write the “never say” list. Banned words do more work than adjectives.
- Name the human you sound like: guide, mechanic, professor, friend.

TOO GENERIC TO BE USEFUL

Professional, friendly, approachable. We speak with authority while remaining accessible.

SPECIFIC ENOUGH TO WORK

Plainspoken and a little dry. We write like a guide on the drift boat, not a catalog. Short sentences. We name gear failures honestly — including our own.

Never say: “elevate your angling journey,” “game-changer,” or anything with an exclamation point.

“Everyone” produces content for no one

WHY IT MATTERS

Specificity here is what makes an idea feel written for the reader instead of at them. Demographics don’t do that — behavior does. Age brackets give the AI nothing to hang an idea on; “they fly with rods” gives it ten.

NO GUIDELINES? START HERE

- Don’t invent a persona. Pull real language from your last 20 support tickets and sales-call notes.
- Add what they already know — beginner vs. upgrader changes every idea you’ll get back.
- Write down what they do, not who they are. Behavior beats demographics every time.

TOO GENERIC TO BE USEFUL

Outdoor enthusiasts, 25–54, who value quality and care about sustainability.

SPECIFIC ENOUGH TO WORK

Weekend fly anglers, 30–50. Two to four trips a year, mostly Western tailwaters. They already own decent gear — they’re upgrading, not starting. They fly with rods, drive three hours to water, and research obsessively before spending over \$150.

If you can't quote it, it isn't a pain point

WHY IT MATTERS

Pain points are the engine — four of the six frameworks in this deck run directly off them. A pain point is a problem in your audience's own words. A feature gap written from your side of the table is not the same thing, and it produces content that sounds like a product page.

NO GUIDELINES? START HERE

- Mine the three-star reviews — yours and your competitors'. That's where the honest language lives.
- Read support tickets and sales objections. Copy the phrasing verbatim, typos and all.
- The test: could you put quotation marks around it? If not, keep digging.

TOO GENERIC TO BE USEFUL

Customers want durable, high-quality products at a fair price.

SPECIFIC ENOUGH TO WORK

"My pack soaked through in an afternoon storm."

"TSA made me gate-check a \$700 rod."

"I bought a sling and hated it after two trips."

"I can't tell whether 'sustainable' here means anything."

Pillars stop the AI from wandering

WHY IT MATTERS

Without pillars you get 50 ideas across 50 unrelated topics and no compounding authority anywhere.

Pillars are also your first prioritization filter: if an idea doesn't belong to one, it probably doesn't belong on the calendar.

NO GUIDELINES? START HERE

- Derive them: cluster your top organic pages, your product lines, and your three most-repeated sales talking points.
- Three to five. More than five and they stop being pillars.
- If a pillar doesn't map to something you sell, it's a hobby.

TOO GENERIC TO BE USEFUL

SEO, social media, industry news, company updates.

SPECIFIC ENOUGH TO WORK

1. Gear that lasts — durability, repair, warranty
2. Travel & packing — flying with rods, carry-on
3. Conservation in practice — materials, B Corp, river cleanups
4. Water & seasons — where to fish, and when

Channel is a constraint, not a checkbox

WHY IT MATTERS

Channel is what gives an idea a shape. “Write a post” without it produces a formless blob that fits nowhere and has to be rebuilt for every platform. Listing the channels you’ve deliberately ruled out matters just as much — it stops the AI from suggesting TikTok every single time.

NO GUIDELINES? START HERE

- Write down what you actually publish and how long it actually is — not the aspirational version.
- Include cadence. It’s what stops the AI planning capacity you don’t have.
- List the channels you’ve ruled out, and why.

TOO GENERIC TO BE USEFUL

Blog, social, email, video.

SPECIFIC ENOUGH TO WORK

Blog: 1,200–1,800 words, how-to and comparison, search-led.

Instagram: 8-slide carousel, hook on slide one, visual-first.

Email: 200 words, one idea, one link, Thursdays.

YouTube: 6–10 min, shot on the water.

We don’t publish on X or LinkedIn.

This is what makes it a pipeline, not a hobby

WHY IT MATTERS

Everything upstream decides whether the content is good. This decides whether it does anything. Without a named next step you get ideas that earn traffic and attach to nothing — and a year later you're defending a content program on impressions.

NO GUIDELINES? START HERE

- One primary, one secondary. Both measurable, both a step a stranger could actually take.
- Name what you won't do — discounts, gated PDFs, demo-booking on cold traffic.
- Every idea should be able to answer: and then what?

TOO GENERIC TO BE USEFUL

Drive brand awareness and increase engagement.

SPECIFIC ENOUGH TO WORK

Primary: get them into the gear-fit quiz → email list.

Secondary: the sling vs. lumbar comparison page → product.

We don't push discount codes — our margin story is repairability, not price.

THE PAYOFF

Six inputs. One profile. Paste it forever.

This is what goes into every prompt from here on. Write it once, save one per brand or client, revisit it twice a year.

BRAND VOICE

Plainspoken, a little dry. A guide on the boat, not a catalog. Never “elevate your angling journey.”

AUDIENCE

Weekend fly anglers, 30–50. Upgrading, not starting. They fly with rods and research before spending.

PAIN POINTS

“My pack soaked through.” “TSA gate-checked my rod.” “Does ‘sustainable’ mean anything here?”

CONTENT PILLARS

Gear that lasts · Travel & packing · Conservation in practice · Water & seasons

CHANNELS

Blog 1,200–1,800w · IG 8-slide carousel · Email 200w Thursdays · YouTube 6–10 min on the water

OFFER / CTA

Gear-fit quiz → email list. Sling vs. lumbar comparison → product. No discount codes.

Anatomy of a great prompt

Every framework you're about to get is built from these five parts. Learn them once and you can write a strong prompt for anything.

- 1 Role** Tell it who to be
- 2 Context** Feed it your brand profile
- 3 Task** Say exactly what you want
- 4 Constraints** Set the guardrails
- 5 Format** Define the output shape

THE PROMPT, ASSEMBLED

ROLE You are a senior content strategist for Fishpond.

CONTEXT Audience: fly anglers. Pain points: gear that survives abuse, packing for travel. Voice: adventurous, not elitist.

TASK Generate 50 content ideas.

CONSTRAINTS In our voice. Avoid greenwashing. Non-obvious ideas only.

FORMAT Grouped by pain point. Titled. Numbered 1-50.

Five parts, every time. That's the whole method.

A role loads a whole body of judgment

WHY IT MATTERS

Two or three words import an entire way of thinking. “Senior content strategist” brings audience thinking, angles and prioritization with it. Without one, the AI defaults to a helpful generalist whose instinct is to explain the topic — not to sell against it.

PRO TIP

“Senior” and “for [brand]” are the two words doing the work. Role-play a job, not a celebrity.

DROP IT AND YOU GET

Encyclopedic explainers. A textbook tone. Everything hedged. It writes about the category instead of writing for a buyer — because nobody told it there was a buyer.

PUT IT IN

“You are a senior content strategist for Fishpond.”

Ideas that assume a customer, a funnel and a competitor.

This is where your brand profile goes

WHY IT MATTERS

The single biggest lever on output quality, and the reason we spent the last seven slides on the brand profile. Context is the difference between the AI writing about your category and writing about your customer.

PRO TIP

Paste the whole profile every time. Don't summarize it — you did the work once, so reuse it verbatim.

DROP IT AND YOU GET

Ideas that are technically on-topic and completely interchangeable with your closest competitor's. This is the failure people mistake for "AI isn't good at this yet."

PUT IT IN

"Audience: weekend fly anglers who fly with rods. Pain points: gear that soaks through, TSA. Voice: plainspoken, never precious."

Ideas that reference your materials, your objections, your rivers.

The verb and the number

WHY IT MATTERS

Vague tasks get vague scope. Ask for “some ideas” and you’ll get five and an offer to continue. The number isn’t vanity — volume is what forces the model past the obvious openers into the territory worth publishing.

PRO TIP

Ask for more than you need. One task per prompt — don’t ask for ideas and a calendar and headlines in one go.

DROP THE NUMBER AND YOU GET

Five ideas, all of which your competitor published in 2023, followed by “Would you like me to keep going?”

PUT IT IN

“Generate 50 content ideas, each solving one specific pain point.”

Fifty — and ideas 30 to 50 are where the interesting ones live.

Constraints are where your judgment lives

WHY IT MATTERS

This is the difference between output you edit and output you publish — and it's the part almost everyone skips. Then they say the AI sounds generic. You never told it what generic looks like.

PRO TIP

Your best constraints are last week's edits. Every time you fix something by hand, that fix is a constraint you owe your next prompt.

DROP THEM AND YOU GET

Greenwashing you can't substantiate. "In today's fast-paced world." Exclamation points. And the same ten angles sitting on page one of Google right now.

PUT IT IN

"In our voice. No sustainability claims we can't substantiate. Nothing requiring a discount. Skip anything already in the top 10 results."

Output that clears your own bar on the first pass.

Format is where the hours are saved

WHY IT MATTERS

Format decides whether you get something usable or a wall of prose you retype into a spreadsheet. Everything upstream makes the output good; this is the part that makes it fast.

PRO TIP

Format for the destination. Ask for the exact column names your sheet already has.

DROP IT AND YOU GET

Flowing paragraphs, inconsistent structure, no grouping — and twenty minutes of copy-paste before the ideas are anywhere you can actually work with them.

PUT IT IN

“Return a markdown table: Idea | Pain point | Pillar | Channel | Hook. Numbered 1-50, grouped by pain point.”

Pastes straight into the calendar you already use.

YOUR PROMPT LIBRARY

6 PROVEN FRAMEWORKS

You just learned the method. Here are six done-for-you prompts — each plugs your brand profile into one specific ideation job. For each, we'll look at the prompt itself and why it's built that way.

1 Audience Pain-Point Ideas

3 One Idea, Every Channel

5 Monthly Content Builder

2 Content Pillar Angles

4 Headline Lab

6 FAQ Content Builder

FRAMEWORK 01

Audience Pain-Point Ideas

Beat the blank page.

Feed it your audience's real struggles and it returns 50 titled, on-brand ideas — grouped by the exact pain point each one solves.

REACH FOR IT WHEN

The calendar is empty and you need range fast — this is the one to run first each quarter.

50 IDEAS IN ONE PASS

Fishpond examples

“The 5 pack mistakes that soak your fly boxes — and how to avoid them”

“Carry-on only: the fly-travel packing list that clears TSA”

Audience Pain-Point Ideas: the prompt

ROLE

You are a senior content strategist for [BRAND].

CONTEXT

[Paste brand profile.] Work from these pain points: [list, in the audience's own words].

TASK

Generate 50 content ideas. Each one solves exactly one pain point.

CONSTRAINTS

Titles in our voice. Nothing already ranking in the top 10 for its topic. No claims we can't substantiate.

FORMAT

Grouped by pain point, numbered 1-50. Title, one-line angle, the pain point it solves.

WHY IT'S BUILT THIS WAY

1 Grouping by pain point is the whole trick

It forces even coverage. Ungrouped, you get 40 ideas about your favorite topic and two about everything else.

2 50, not 10

The first ten are the consensus ideas your competitors already published. Volume is what buys you the rest.

3 One pain point per idea

Without this you get mushy do-everything posts that rank for nothing and convert no one.

2

FRAMEWORK 02

Content Pillar Angles

One topic, twenty angles.

Take a single content pillar and explode it into 20 distinct angles — beginner explainer to contrarian hot take — so a pillar never runs dry.

REACH FOR IT WHEN

A pillar feels exhausted, or one topic is quietly carrying the whole strategy.

PILLAR → 20 ANGLES

Fishpond examples

Pillar: Conservation → “start here” guide, myth vs. fact, data-led, hot take...

Pillar: Travel → gear teardown, the three-airport test, “what I stopped packing”

Content Pillar Angles: the prompt

ROLE

You are a senior content strategist for [BRAND].

CONTEXT

[Paste brand profile.] The pillar we're working on: [one pillar only].

TASK

Give me 20 genuinely distinct angles on this single pillar.

CONSTRAINTS

Every angle a different type: beginner explainer, myth vs. fact, data-led, contrarian, personal story, comparison, behind-the-scenes, seasonal, objection-handler, hot take. No two the same.

FORMAT

Table: Angle type | Working title | Who it's for | Why now.

WHY IT'S BUILT THIS WAY

1 Naming the angle types is the fix

Left alone, the model happily returns twenty near-identical listicles. Give it a taxonomy and it has to stretch.

2 One pillar per run

Feed it all four and you get five shallow ideas each. Depth comes from narrowing the input, not widening it.

3 “Why now” earns its column

It forces a reason to publish — which becomes your prioritization filter when you're staring at 80 ideas.

FRAMEWORK 03

One Idea, Every Channel

Write once, post everywhere.

One idea, rewritten natively for every channel — not copy-pasted, but adapted to how each platform is actually consumed.

REACH FOR IT WHEN

Something performed well on one channel and you want the other four without rewriting it.

1 IDEA → EVERY CHANNEL

Fishpond examples

One river guide → IG carousel · YouTube script · blog · email · TikTok hook

Blog how-to → 8-slide carousel · 200-word email · 8-minute on-the-water film

One Idea, Every Channel: the prompt

ROLE

You are a content strategist who has personally run each of these channels.

CONTEXT

[Paste brand profile, including channel specs.] The idea: [one idea].

TASK

Adapt this single idea natively for each channel we publish on.

CONSTRAINTS

Not copy-paste. Each version uses that format's native mechanics — hook-first for carousels, search intent for blog, one idea for email. Respect our length specs. Skip channels we don't use.

FORMAT

One block per channel: hook, structure outline, CTA, target length.

WHY IT'S BUILT THIS WAY

1 Your channel specs do the heavy lifting

This is the framework that pays back input five. Without those specs it invents lengths and formats you don't publish.

2 “Not copy-paste” has to be said

The default behavior is to reformat the same paragraphs. Naming the failure mode is what prevents it.

3 Outlines, not finished posts

You stay the writer. Outlines are editable in seconds; a finished draft you disagree with costs more to fix than to write.

FRAMEWORK 04

Headline Lab

Win the first line.

25 scroll-stopping hooks for any topic across 10 proven hook types — written in your voice, with the top 3 starred for you.

REACH FOR IT WHEN

The piece is written and the headline is the thing standing between it and being read.

25 HOOKS PER TOPIC

Fishpond examples

**“Here’s what nobody tells you about
carry-on rod cases...”**

**“The rod-case mistake that costs anglers
\$700 at the gate”**

Headline Lab: the prompt

ROLE

You are a direct-response copywriter writing in our voice.

CONTEXT

[Paste brand profile.] The topic: [topic]. Three headlines that performed well for us: [paste].

TASK

Write 25 headlines across 10 hook types.

CONSTRAINTS

Our voice. No promise the piece can't pay off. Under 70 characters where it's for search. Then star your top three and tell me why.

FORMAT

Grouped by hook type, numbered, top three marked.

WHY IT'S BUILT THIS WAY

1 Pasting three of your own winners

The fastest voice-training move in this deck. Showing beats describing — one example outperforms a page of adjectives.

2 Ten hook types, not 25 headlines

Otherwise you get 25 variations on one structure and a false sense of range.

3 Make it pick, and justify

Asking for a ranked top three with reasoning turns the tool into a second opinion instead of a vending machine.

FRAMEWORK 05

Monthly Content Builder

A month, planned in minutes.

A full 30-day calendar mapped across your pillars, channels and formats — balanced so the feed never feels repetitive.

REACH FOR IT WHEN

Planning week. You have the ideas and need them sequenced into a month you can actually ship.

30 DAYS, ONE TABLE

Fishpond examples

**Day × Pillar × Channel × Format × Hook ×
CTA — ready to schedule**

**Week 1 leans Travel, week 3 leans
Conservation — never two in a row**

Monthly Content Builder: the prompt

ROLE

You are a content strategist and editorial planner.

CONTEXT

[Paste brand profile.] Our real cadence: [posts per channel per week]. Coming up: [seasonality, launches, events].

TASK

Build a 30-day content calendar.

CONSTRAINTS

Balance the pillars — no two consecutive days on the same one. Match our actual cadence; don't invent capacity. Every piece maps to a pillar and a CTA.

FORMAT

Table: Day | Pillar | Channel | Format | Working title | Hook | CTA.

WHY IT'S BUILT THIS WAY

1 The balance constraint gets forgotten

Without it you get fourteen days of your biggest pillar and a feed that reads as repetitive by week two.

2 “Don't invent capacity”

Give it your real cadence or it will confidently plan a daily YouTube channel you do not have.

3 Column names match your calendar

Format for the destination — this is the one that pastes straight into the sheet and saves the afternoon.

FRAMEWORK 06

FAQ Content Builder

Turn hesitations into content that sells.

The 15 questions and objections buyers have before they choose you — each turned into a piece of content, ordered by buying stage.

REACH FOR IT WHEN

Traffic is fine but nothing converts — start with what buyers hesitate over.

OBJECTION → CONTENT

Fishpond examples

“Is it worth the price?” → “What Certified B Corp actually means for your gear”

“Why we don’t discount” → the repairability and warranty explainer

FAQ Content Builder: the prompt

ROLE

You are a senior content strategist who has sat in on our sales calls.

CONTEXT

[Paste brand profile.] What we sell, what we charge, and where we sit against [competitors]. Real objections we hear: [paste].

TASK

Give me the 15 questions and objections buyers have before choosing us — each turned into a piece of content.

CONSTRAINTS

Real hesitations, including the uncomfortable ones about price and competitors. Answer honestly; no dodging. Order by buying stage.

FORMAT

Table: Objection | Stage | Content title | Format | The honest answer, in one line.

WHY IT'S BUILT THIS WAY

1 “Including the uncomfortable ones”

Leave it out and you get soft, flattering FAQs that no actual buyer is asking. Naming price and competitors is what unlocks the useful list.

2 Ordered by buying stage

Turns a list into a funnel, and tells you what to publish first instead of leaving you to guess.

3 The honest-answer column is your brief

One line per objection is usually enough for a writer to start from — including when the writer is you.

SO I RAN IT MYSELF

ONE BRAND. ONE PROMPT. FIFTEEN MINUTES.

Fishpond — sustainable fly-fishing gear. · Here is exactly what I did, and what came back.

Three steps and a timer

0:00

Paste the brand profile

The one from earlier — unchanged, straight out of the doc. It's the only part I'd already done.

2:00

Paste Framework 01, unedited

The exact prompt you just saw. I changed the brand name and nothing else.

2:30

Read, cut, keep

Fifty came back in under a minute. The other twelve were me reading and making calls.

WHAT I THREW AWAY

6

already covered on our own blog

3

needed claims we can't substantiate

2

were quietly the same idea twice

***39 kept — a quarter of a year's content
from one prompt.***

15 minutes later...

Hours of scrambling → **15 min**

- 1 The 5 pack mistakes that soak your fly boxes
- 3 Sling, lumbar, or chest pack? Pick the right one
- 5 5 under-the-radar rivers worth the extra drive this fall
- 7 What “Certified B Corp” really means for the gear you buy

- 2 Carry-on only: a fly-fishing packing list that clears TSA
- 4 How our recycled fabric starts as discarded fishing nets
- 6 Rig your gear so the fly you need is always in reach
- 8 Protect your rod in transit: the 60-second pack-down

...and 42 more, each tied to a real audience pain point and written in the brand's voice.

Find what you're missing in AI answers

Competitors are getting cited in AI Overviews and ChatGPT answers. Enter two or three of them and the tool finds the questions where you're invisible — and what to publish to show up.

1

Enter 2–3 competitors

brand names or domains

2

It builds an AEO/GEO prompt

tuned to your brand & topic

3

Run it in a search AI

→ your visibility gap map

SAMPLE GAP FOUND · FISHPOND

Q “best fly fishing sling pack”

AI cites Orvis & Simms — not Fishpond

→ **Publish: “Sling vs lumbar: pick your pack”**

Q “how to pack for a fishing trip”

Whitespace — nobody owns this answer

→ **Publish: “Carry-on only: the fly-travel list”**

The repeatable workflow

1

Train once

Save your brand — and a profile per client

2

Generate

Ideas, hooks, calendars — plus AI-answer gaps

3

Produce

Prioritize → brief → first draft

4

Refresh

Improve existing pages, then repeat

The result: 50+ ideas from one prompt, up to 70% less planning time — and it works on pages you've already published, not just new ones.

YOUR TURN

Walk out and use it today

Build your brand profile

Six inputs, saved per client. Do it once.
